Forecast for Wednesday 23 Jun 2021

Weather: Some early clear spells at first but becoming cloudier through the early hours with outbreaks of rain and drizzle spreading southeast. Then a mostly cloudy day with further rain and drizzle, perhaps persistent for a time through the mid to late morning. Some brighter spells are possible over eastern fells.

Chance of cloud free mountain/hill tops above 800m: In east, Close to 100% at first in east but soon falling to 25%, elsewhere close to zero.

Visibility: Periods or persistent cloud above about 300-450m across western and central fells, but cloud more occasional at times above about 600m in the east. Away from cloud, good falling to several kilometres in rain and drizzle.

Meteorologist's View

Rather chilly over the higher fells at first. Maximum valley temperatures around 16 Celsius in west, perhaps 18 Celsius in any brighter spells in east.

Forecast for Thursday 24 Jun 2021

Weather: Cloudy overnight and through the morning with outbreaks of mainly light rain. Becoming drier and brighter, with some sunshine, for a time through the afternoon but cloud and occasionally heavy rain returning in the evening.

Maximum wind: Westerly 10-15mph

Chance of cloud free mountain/hill tops above 800m: Little chance through the morning and again in evening, but improving to 75% for a time in the afternoon.

Visibility: Periods or persistent cloud above 300-450m in west and nearer 600m in east through the morning and again in evening, but occasional above 750m for a time through the afternoon. Away from cloud, visibility good falling to several kilometres in rain.

Temperature: **Valleys:** Plus 11 or 12 Celsius at dawn rising to a humid plus 20 or 21 Celsius by day.
At 800m: Around plus 10 Celsius
Freezing level: Well above the summits
